

ZBS-4C / 6C connections

Power supply from the building

The air lines are properly connected when the correct color of the wire is left plugged into the correct connector:

Nr. 1 – blue hose 12",

Nr. 2 – red hose 12",

Nr. 3 – yellow hose 12",

Nr. 4 – green hose 12",

Nr. 5 – screw that must be unscrewed to remove the cover and clean or replace the filter,

Nr. 6 – alarm lamp that will light up when the blower fails.

If the cables are connected correctly, after turning on the power, we should observe the operation of the mammoth pumps.
